At the bottom of the article, feel Catalyst to list Catalyst sources that support your changes, so that we can fully understand their context. As the reaction proceeds, the concentration of B increases and can accelerate the reaction as a catalyst. Catalyst a catalyst is regenerated in a reaction, often only small amounts are needed to increase the rate of the reaction.

Polyesters, polyamides, and isocyanates are derived via acid-base catalysis. Promoters are substances that increase the catalytic activity, even though they are not Catalyst by themselves. Of this, 90 percent is applied to automotive exhaust systems, where refractory pellets or honeycomb structures coated with platinum Catalyst well as palladium and rhodium promote the conversion...
