The first is practical: a rain garden allows you to conserve resources by working with nature rather than against it. Other cities connect storm drains to underground creeks, and the polluted water runs straight into the bay or nearby river. By using our site, you agree to our collection of information through the use of cookies. You're using an out-of-date version of Internet Explorer. Instead of washing contaminants from roofs, streets, and storm drains into the nearest lake or estuary, rain would sink into the soil, rehydrating parched landscapes and recharging aquifers. Contributor Uncapher, Apryl. More From Research Center. Rain gardens have been proven to reduce flooding, reduce water pollution, and beautify landscapes in homes across the country.
