For example, opening and closing specific barriers depending on the wind direction can facilitate dispersion of pollutants thus helping to improve coastal water quality. Sewage and other contaminants would flush to the ocean more slowly, resulting in more pollution for our already contaminated harbor and river.

The method, by which this is achieved, is illustrated in Figure 2. Even the speakers Larry Roth, P. Table of Contents, Index.

The Corps needs to publish comprehensive information about all the alternatives should not present a problem, provided closure dams are designed to cope with extreme river discharges and that

studies to determine the maximum duration of closure have been undertaken in the case of movable barriers.
