Weeds and insects develop resistance, as Darwinian evolution teaches. A basic human responsibility is honesty, which unfortunately is broken by . The case. People's well-being should be promoted, and their values and choice respected, but equally, which places limits on the pursuit of individual autonomy. Of course, we also need to ask why people choose the answers that they do [1, 12]. Attentiveness to potentially catastrophic risk and to preservation of farmland has created a groundswell of environmentally based concern about agricultural biotechnology in Europe. Rome, Italy The greatest public concern is over the mixing of human and animal genes.
