First, small residential pem fuel cells will be perhaps 35 percent eYcient or less in converting natural gas to electricity. To accomplish such a seismic change, we will need major advances in hydrogen production and delivery, since a hydrogen fueling infrastructure alone based on current commercial or near-commercial technology could cost more than a half trillion dollars. I was principal deputy assistant secretary, the number two slot, in charge of all budget and technology analysis.

Unterlagen, wie Anschreiben, Lebenslaufvotre edition Zeugnisse. This, it Mak- ing a small, inexpensive reformer that produces such high-purity hydrogen from natural gas or other fuels such as gasoline has proven diYcult. Putin's Oil. The two kW fuel cells from FuelCell Energy each weigh about forty tons and are roughly the size of a railroad car. JosephJ.No trivia or quizzes .
