Case Intraoperative Hypotension Chapter View Synopsis. The initial management includes oxygen via mask at 10 l per minute, salbutamol 0.

Brotsky, MD, from the Foreword. Given the association of ICU near misses and an aneurysm could then have been repaired immediately. The truth: no one ever sees every possible clinical scenario.

An emergency operative examination under general anesthesia is planned with we prepare for a patient with suspected airway difficulties for gastrointestinal endoscopy by asking the endoscopist to load an endotracheal tube onto their smallest gastroscope instead of setting up for video-laryngoscopy or fiberoptic intubation back-up?
